

The Nextiva App

Takes business mobility to the next level

Overview

The Nextiva App takes business mobility to the next level by giving users the freedom to use and manage their business phone system anywhere, at any time. The Nextiva App is the primary access point for business users to manage their unified communications solution. It has never been easier to use voice, video, instant messaging and presence services from a single device. Users can access business phone account information and feature settings from their computer, tablet or any mobile device. The app is supported in Windows, Mac OS X, iOS or Android platforms.

Nextiva App Benefits

The Nextiva App enables a new level of flexibility and productivity that truly changes the way businesses operate. No longer tied to a control panel interface or required to have system administrators make changes, users can instantly update their communications service from anywhere.

- **Voice Calling** - Make and receive calls from any devices while displaying your business number to those you are calling
- **Video Collaboration** - Save the travel time and costs when you connect face-to-face virtually with HD video calls with other Nextiva App users
- **Presence** - Adjust your availability settings or easily check the status of a contact to determine the best time and method to reach them.
- **Chat Rooms & IM** - Activate chat rooms or engage in instant messages with coworkers that appear simultaneously on multiple devices
- **Cloud Sync** - All of your contacts, voice mails, call history, and settings are simultaneously synced to the cloud and available on any device on your Nextiva account
- **Call Pulling** - Seamlessly transfer your active voice and video calls between your office and mobile phone
- **Call Management** - Control your incoming and outgoing call settings directly from the Nextiva App and your settings will sync to your other devices
- **Desktop Sharing** - Share your screen with colleagues and customers (no matter their operating system) for seamless collaboration

Summary

The Nextiva App is compatible with Nextiva Office® Pro Plus and Enterprise plans and can be quickly added to customer accounts. A simple download from our website of the version you need and a quick call to our support team will add the freedom and mobility of the Nextiva App to your business communications.
